

Test Case: Embedded Audio Attachment (MP3)

This PDF has an MP3 audio file embedded as a file attachment.

It is the MP3 counterpart to case-audio-attachment.pdf, which carries the same kind of attachment in WAV format. Together they cover both audio formats the viewer needs to support.

A viewer that supports attachments should list "case-note-audio.mp3" and, ideally, play it inline rather than only offering a download.

Audio: 2.0s two-tone (523 Hz + 784 Hz), mono, 128 kbps, 44.1 kHz.
It is audibly different from the WAV file, so the two are easy to tell apart when testing playback by ear.
